

## Elithion, Top Provider of Li-Ion Battery Management Solutions Announces the Release of the Wireless Advisor

On line PR News - July 11, 2013 -Boulder, CO

Elithion, a top provider of Lithium-Ion Battery Management Systems, announces the release of the Wireless Advisor, a product that allows users to monitor the state of a battery on smart phones, tablets and laptop computers. The Wireless Advisor reassures users that their Elithion BMS is safely protecting its battery.

State of Charge, pack current, pack voltage, individual cell voltages, temperatures, and general battery status are quickly accessible through various screens. The data are also plotted and stored in a log for further analysis.

As an accessory to an Elithion BMS, the Wireless Advisor makes the battery status conveniently available to any WiFi enabled device, using any web browser.

For more information go to the [Wireless Advisor page](http://elithion.com/2WF0000E.php) (<http://elithion.com/2WF0000E.php>) To order a Wireless Advisor for your Elithion BMS, you can contact Elithion directly at <http://elithion.com/contact.php>.

Elithion has been designing and manufacturing Battery Management Systems (BMS), large Li-ion traction packs and battery modules for stationary battery installations since 2008. The Elithion team has comprehensive experience in electronics design as well as extensive expertise in validated and proven battery systems engineering working with large cell suppliers and integrating custom solutions. Worldwide client installations encompass the automotive, utility vehicle, marine, power utility and telecommunications industries.
